

VISITOR FLOW MANAGEMENT

restore the economy and create a safe environment for your customers and staff

1 OPEN YOUR STORE IN THE NEW ERA

With new challenges and thresholds such as the amount of customers per m².

2 COUNTING SENSORS

Use new or your existing Cross Point counters and start now. 3D cameras, laser counters or use the build-in counters in the EAS pedestals. Connected to the cloud or stand-alone. You choose.

3 USE DISPLAYS INSTEAD OF YOUR STAFF

TV-Screens, monitors and tablets can be used to inform your customers and staff. Icons and texts can be altered to match your company branding. If you (also) use our EAS pedestals, we can color the lights to show customers if they are allowed to enter. Sound will be played when maximum occupancy is triggered.
